ATHLETE PROFILE

ALL-ROUND PERFORMANCE

Strongest on descent mastery terrain (15.65 km/h), with vertical power the limiting dimension (1274.5 m/h). Performance indices held close to first-half levels through to the finish.

PRIMARY STRENGTH

Descent Mastery — 15.65 km/h, peaking on Courmayeur → Tête de la Tronche.

01 OPENING

The race opened with the strongest climbing output of the day: 1475.2 m/h on Courmayeur → Tête de la Tronche, well above the eventual race-average VPI.

02 TURNING POINT

Around km 90, climbing and descending indices decline together — VPI index drops to 843m/h and DMI index to 12.3 km/h,. The clearest inflection point in the race sits near km 90, where position and performance indices move together.

03 CLOSING

From this point, effort pace slows from 3.39 to 3.77 min/km (11.4% change), and VPI falls 13.8% while DMI falls 11.0% between race halves.

KEY SEGMENTS

SEGMENT	DIST (KM)	SLOPE	VPI	DMI	ER IDX	SIGNAL
BEST CLIMB						
Courmayeur → Tête de la	0.0 - 9.4	+18.8%	1475.2	19.19	100	Strongest climbing output of the race on this segment.
WORST CLIMB						
Les Tseppes → Vallorcine Entrée	82.9 - 90.1	-9.9%	843.2	12.3	64	Climbing output dropped furthest below this runner's own race average here.
BEST DESCENT						
Courmayeur → Tête de la	0.0 - 9.4	+18.8%	1475.2	19.19	100	Fastest technical descent of the race on this segment.
WORST DESCENT						
Les Tseppes → Vallorcine Entrée	82.9 - 90.1	-9.9%	843.2	12.3	64	Descent speed dropped furthest below this runner's own race average here.
LARGEST DEGRADATION						
Les Tseppes → Vallorcine Entrée	82.9 - 90.1	-9.9%	843.2	12.3	64	Sharpest simultaneous drop in climbing and descending indices in the race.
BEST RECOVERY						
Vallorcine Sortie → Chamonix	90.1 - 107.8	-1.1%	960.9	13.28	73	Climbing and descending indices ticked back up here rather than continuing to fall.

VERTICAL TRAIL LABS ASSESSMENT

ATHLETE PERFORMANCE SUMMARY

Cristian MINOGGIO's race data fits an all-round specialist, driven by a descent mastery of 15.65 km/h against a vertical power of 1274.5 m/hl producing the most complete performance of the men's race. Fatigue resistance was also strong: VPI fell 13.8% and DMI fell 11.0% between race halves, alongside a 11.4% slowdown in effort pace.

PERFORMANCE SIGNATURE

KEY TAKEAWAYS

- 01** His VPI of 1274.5 was the highest of the Top 10, as was his DMI of 15.65.
- 02** Vertical Power decreased in the second part, falling furthest under fatigue, with 843.2 m/h on Les Tseppes → Vallorcine Entrée.
- 03** Km 69.2 marked the race's defining moment, where Christian took the lead and never let it go.
- 04** Second-half pacing decay, not a single bad segment, was the main performance characteristic of the race.

METHODOLOGY

VPI

Vertical Power Index
Uphill efficiency on steep climbing terrain.

DMI

Descent Mastery Index
Downhill speed and technical efficiency.

ER

Endurance Rating
Terrain-adjusted endurance and fatigue resistance.

Raw metrics retain their original units. Normalized indices are used for visual comparison.
