01 OPENING

The race opened with the strongest climbing output of the day: 1249.7 m/h on Courmayeur → Tête de la Tronche, well above the eventual race-average VPI. Position opened at #8 and moved toward #12 inside the first quarter of the course.

02 TURNING POINT

On Km80, Caitlin recorded her second highest VPI of the day: 1207m/h. Around km 90, climbing and descending indices decline together — VPI index drops to 720m/h and DMI index to 10.5km/h.

03 CLOSING

From this point, effort pace slows from 4.15 to 4.46 min/km (7.6% change), and VPI falls 9.5% while DMI falls 7.2% between race halves. Position kept trending toward the front through the finish, closing at #5 from #14 in the 2nd half of the race.

VERTICAL TRAIL LABS ASSESSMENT

ATHLETE PERFORMANCE SUMMARY

Caitlin FIELDER's race data fits an endurance specialist, driven by an endurance of 92.4 pts (2nd highest between top field) against a vertical power of 1081.2 m/h. The clearest performance cost came from climbing, which declined furthest as the race progressed, but managed to produce almost her top value after km80 . Fatigue resistance was strong: VPI fell 9.5% and DMI fell 7.2% between race halves, alongside a 7.6% slowdown in effort pace. Position tracked this closely, improving from #8 to a final #5, with a best of #5 reached along the way. The defining characteristic of the race was a strong endurance performance .
