ATHLETE PROFILE

ENDURANCE SPECIALIST

Strongest on endurance terrain (97.7 pts), with vertical power the limiting dimension (1125.0 m/h). Performance indices held incredible close to first-half levels through to the finish.

PRIMARY STRENGTH

Endurance — the strongest of the three dimensions (97.7 pts).

LIMITING FACTOR

No limiting factor detected.

01 OPENING

The race opened with her 2nd strongest climbing output of the day: 1260 m/h due to race startup. After settling in a right pace after reaching position 20th, her furthest distance from the lead.

02 TURNING POINT

Around km 90, climbing and descending indices decline together — VPI index drops to 765m/h and DMI index to 11.16km/h, the first point in the race where both terrain dimensions move down at the same time.

03 CLOSING

From this point, effort pace only slows from 4.14 to 4.23 min/km (2.3% change), and VPI falls 5.4% while DMI falls 2.9% between race halves.

KEY SEGMENTS

SEGMENT	DIST (KM)	SLOPE	VPI	DMI	ER IDX	SIGNAL
BEST CLIMB						
Trient → Les Tseppes	79.1 - 82.9	+24.1%	1281.7	16.17	98	Strongest climbing output of the race on this segment.
WORST CLIMB						
Les Tseppes → Vallorcine Entrée	82.9 - 90.1	-9.9%	765.2	11.16	68	Climbing output dropped furthest below this runner's own race average here.
BEST DESCENT						
Martigny → Trient	69.2 - 79.1	+10.8%	1183.7	16.41	100	Fastest technical descent of the race on this segment.
WORST DESCENT						
Les Tseppes → Vallorcine Entrée	82.9 - 90.1	-9.9%	765.2	11.16	68	Descent speed dropped furthest below this runner's own race average here.
LARGEST DEGRADATION						
Les Tseppes → Vallorcine Entrée	82.9 - 90.1	-9.9%	765.2	11.16	68	Sharpest simultaneous drop in climbing and descending indices in the race.
BEST RECOVERY						
Vallorcine Sortie → Chamonix	90.1 - 107.8	-1.1%	918.8	12.7	82	Climbing and descending indices ticked back up here rather than continuing to fall.

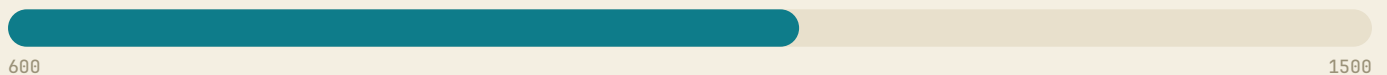

VERTICAL TRAIL LABS ASSESSMENT

ATHLETE PERFORMANCE SUMMARY

Yngvild KASPERSEN's race data fits an endurance specialist, driven by an endurance of 97.7 pts against a vertical power of 1125.0 m/h. The endurance ability allowed her to record the highest VPI between km 79>83. Her fatigue resistance was really strong: VPI fell 5.4% and DMI fell 2.9% between race halves, alongside a 2.3% slowdown in effort pace, that's give a record high 97.7 in VTL . This strategic and high disciplined control, allowed to Yngvild to never stop passing top10 competitor and finally closing the gap with the leader on the last 17 km.

KEY TAKEAWAYS

- 01** Endurance was the defining strength, anchored by an VTL record high ER = 97.7
- 02** Vertical Power capped overall performance, falling furthest under fatigue, with 765.2 m/h on Les Tseppes → Vallorcine Entrée.
- 03** Km 90 marked the race's defining moment, where the final push allowed hed to go from 3rd to 1st on Chamonix.
- 04** Second-half pacing, not a single bad segment, was the main performance characteristic of the race.

METHODOLOGY

VPI

Vertical Power Index

Uphill efficiency on steep climbing terrain.

DMI

Descent Mastery Index

Downhill speed and technical efficiency.

ER

Endurance Rating

Terrain-adjusted endurance and fatigue resistance.

Raw metrics retain their original units. Normalized indices are used for visual comparison.
